

**CurbAlert  
Control Unit and  
Video Camera**

## The Complete Curbside/To-Go Solution

As the need for efficient curbside service increases, LRS is offering the complete curbside solution – CurbAlert. CurbAlert is the first solution that doesn't require major invasive construction such as loop sensor installation, concrete posts and major electrical wiring. This all-in-one system allows restaurateurs to install only one camera to monitor up to six lanes and instantly alert staff via alphanumeric pager when a car enters the designated lane(s). With the ability to instantly alert staff, CurbAlert will not only improve your service but will also bolster your bottom line.

### Benefits:

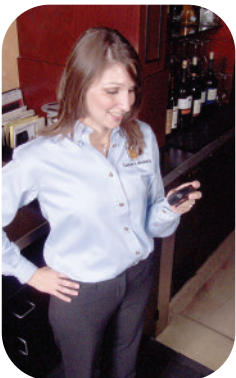

- Improve service with instant pager notification of car arrival
- Improve monitor, greet and service response times
- Create a convenient curbside, to-go option for customers
- Inexpensive, non-invasive installation

### System Features

- Monitors Greet Times and Total Service Times
- Daily summary reporting
  - Average greet time
  - Average total time
  - Number of cars served
  - Percentage of target times met
- Built-In Transmitter for immediate staff notification - via alphanumeric pager
- Utilizes one camera to monitor up to six lanes
- Automatic paging if service/greet target times are exceeded
- Visual on screen timer for each lane
- 12" Color LCD, paging transmitter and PC all in one unit
- Complete lane sensing configuration
- Convenient one button per lane interface
- 2 USB ports for keyboard and printer connection
- High speed ethernet connection
- Standard mounting bracket for flexible installation
- All-purpose, weather-resistant camera

**Alphanumeric  
Pager**
